

Separate infrastructure for attribution
① infrastructure support: attribution

→ trust hardware vendors, software vendors
→ trust configuration, installation, etc, those who do it

1) What is attribution?

a) Why do we want attribution?

b) What do we want to know?

c) When do we NOT want attribution?

2) What is the required infrastructure?

a) How can GENI provide attribution?

3) A whole bunch of policy stuff....
